

## LIGHTS FOR DECOMMISSIONING MARKING

LED Marine Lanterns  
for Marking Offshore  
Oil & Gas Structures

Sealite is an international designer  
& manufacturer of complete  
Aids to Navigation systems.

We believe technology improves navigation™

# Solar and Stand Alone LED Marine Lanterns for Marking Offshore Oil & Gas Structures

Sealite's solar and stand alone marine lanterns are high quality products that meet or exceed the Private Aid to Navigation (PATON) requirements for the Code of Federal Regulations (CFR) 33 part 37, to mark decommissioned offshore oil and gas structures. Each of Sealite's marine lanterns are designed for ease of installation, maintenance and monitoring.

With ranges from 1NM to 9NM, there is a Sealite product to suit almost every application or installation requirement.

Please contact Sealite to discuss your specific marking requirements.

# Class Lights Requirements

## CLASS A

- For Class 'A' defined structures
- Shall be white lights
- Visible range of a distance of at least five (5) nautical miles
- When multiple lights are required, the lights must flash in unison at 60 flashes per minute
- Displayed at 20 feet above mean high water

## CLASS B

- For Class 'B' defined structures
- Shall be white lights
- Visible range of a distance of at least three (3) nautical miles
- When multiple lights are required, the lights must flash in unison at 60 flashes per minute
- Displayed at 20 feet above mean high water

## CLASS C

- For Class 'C' defined structures
- Shall be white or red lights
- Visible range of a distance of at least one (1) nautical mile
- When multiple lights are required, the lights must flash in unison at 60 flashes per minute
- Displayed at specified height above mean high water determined by District Commander
